PROFESSIONAL SUMMARY

Solution Architect and Senior Software Engineer with 7+ years of experience designing, implementing, and optimizing scalable, high-availability systems across fintech, e-commerce, IoT, and enterprise security domains. Proven expertise in backend architecture, cloud-native development (AWS, GCP), and microservices design. Adept at leading technical architecture discussions, migrating legacy systems, and delivering mission-critical solutions. Strong background in Golang, Java (Spring Boot), and Node.js with hands-on experience in serverless architectures and container orchestration.

CORE COMPETENCIES

- **Architectural Design:** Technical architecture discussions, solution design, microservices architecture, system migration, API integration
- **Cloud Platforms:** AWS (Lambda, SQS, EKS, DynamoDB, Serverless Architecture), GCP, Firebase
- **Backend Languages:** Golang (Gin, Gorm), Java (Reactive, Spring Boot, Spark, J2EE, JSP), Node.js (Express, Fastify, Prisma), Python (Flask, FastAPI)
- **Databases:** SQL (MySQL, Postgres, Oracle), NoSQL (MongoDB, Firestore, DynamoDB)
- **DevOps & CI/CD:** Docker, Kubernetes, Jenkins, Terraform, Git
- **Frontend:** HTML, CSS, jQuery, Bootstrap
- **Leadership:** Cross-functional collaboration, client communication, requirement translation, agile methodologies

PROFESSIONAL EXPERIENCE

Acxhange | Senior Software Engineer

Mar 2026 – Present | Full-time | Chennai, Tamil Nadu

- Working with a modern serverless stack including **Node.js, AWS, Lambda, DynamoDB, and Serverless Architecture**.
- Contributing to the design and development of scalable, cloud-native solutions.
- Top skills: Node.js, AWS, Serverless Architecture, DynamoDB, Lambda.

Wipro | Software Engineer-2

Jun 2024 – Mar 2026 | Mysuru, Karnataka

- Served as a Backend Engineer for **Cisco's FEDRAMP** product, a critical solution for data loss prevention and malware protection.
- Facilitated the migration from a polyglot architecture to a streamlined, fully **Node.js-based infrastructure**.
- Tech stack: Golang, Node.js, Lambda, SQS, Postgres, Mongo, Redis, Git, Docker, EKS, AWS.

Skortech | Software Engineer-2

Jan 2023 – Jun 2024 | Mysuru, Karnataka

- **Spearheaded technical architecture design** and discussions to devise an optimal solution for an **enterprise-grade rewards system**.
- Successfully orchestrated the full lifecycle implementation, integrating with multiple third-party APIs and leveraging **microservices architecture** to ensure scalability and high availability.
- Implemented an **in-house mail server** solution leveraging the open-source mailcow platform. Optimized the system for high availability, load balancing, and fault tolerance to seamlessly handle over **200,000 active users**.
- Tech stack: Golang (Gin, Gorm), Lambda, SQS, Postgres, Mongo, Redis, Git, Docker, EKS, ELK, AWS.

66Degrees | Software Engineer

Aug 2021 – Jan 2023 | Mysuru, Karnataka

- Developed and maintained an internal employee management system using **Node.js and TypeScript**.
- Served as the dedicated **primary point of contact for Locix**, a cutting-edge U.S.-based Internet of Things (IoT) project.

- Spearheaded the maintenance and continuous enhancement of the IoT platform. Collaborated closely with cross-functional teams, translating business requirements into technical specifications and driving the implementation of new features and optimizations.
- Tech stack: Golang, Python, DynamoDB, Lambda, Kafka, Jenkins, Git, AWS.

Unilog | Software Engineer

Oct 2020 – Aug 2021 | Mysuru, Karnataka

- Played a crucial role in the ongoing maintenance and continuous enhancement of a **mission-critical B2B e-commerce platform**, serving a diverse portfolio of enterprise clients across multiple industries.
- Collaborated closely with cross-functional teams, gathering and translating business requirements into technical specifications for new features and optimizations.
- Leveraged agile methodologies and streamlined the development lifecycle, enabling rapid iteration and deployment of updates with minimal downtime.
- Tech stack: Java (Spring Boot), Node.js (Express/Fastify, Prisma), Postgres, Git, GCP.

TORUS | Software Engineer

Mar 2019 – Jun 2020 | Mysuru, Karnataka

- Played a pivotal role as a **full-stack engineer**, spearheading the complete lifecycle of Android app development.
- On the front-end, applied expertise in modern Android development frameworks and libraries. Simultaneously, engineered robust back-end services and APIs, leveraging RESTful architectures and secure data storage solutions.
- Tech stack: Android (Java), Backend (JSP), MySQL, AWS.

EDUCATION

M.Tech, Mechanical Engineering

Sri Siddhartha Institute of Technology (SSIT), Tumkur, Karnataka

Dec 2017 | GPA: 9.18/10

B.E., Mechanical Engineering

Vidya Vardhaka College of Engineering (VYCE), Mysuru, Karnataka

May 2015 | Percentage: 60%
